Dave Green Gardens

W W W . D A V E G R E E N . C O . U K

Dave Green Gardens (DG Gardens) is a gold medal winning garden and landscape design practise based in the Midlands near to Birmingham. The practise focuses on working to create calm, tranquil and beautiful escapes for discerning individuals with exceptional detail and quality throughout.

After working for the Royal Horticultural Society for over ten years, Dave founded the company in 2017. Having worked at Birmingham Botanical Gardens, RHS Garden Wisley, at several of the RHS Flower Shows and also in public gardens in South Africa and Japan, Dave now uses his skills and experience

to develop residential and commercial gardens and landscape projects. Dave Green Gardens recently won a gold medal, best in category and best construction awards for a garden created for the 2019 RHS Hampton Court Flower Show.

GUIDED BY
EXCELLENCE

Dave is highly qualified, qualifications include:

- MA Landscape Architecture
- RHS Wisley Diploma Practical Horticulture
- Nat Cert Horticulture
- RHS Certificate Level 2 & Level 3
- BSc Management Science
- MSc Computer Science

DG Gardens awards include:

- 2022: Finalist in Association of Professional Landscapers awards
- 2019: Gold medal, Best in Category, Best Construction, RHS Hampton Court Flower Show
- 2018: Silver-Gilt medal, People's Choice Award, RHS Tatton Park Flower Show
- 2011: RHS Wisley - Best Trainee Award for outstanding horticultural excellence

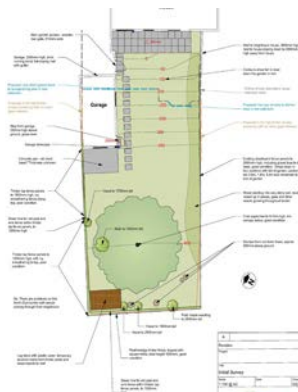

Dave Green Gardens is a Limited company, (Company Number 10939615). The company was registered on 31 August 2017 and has been trading continuously since that date. Dave Green is the Managing Director, he owns and runs the company on a day to day basis and leads on all garden design projects.

The company is registered for VAT (VAT No. 386 5032 82) and has full business insurances valid until Jan 2024 with details available on request.

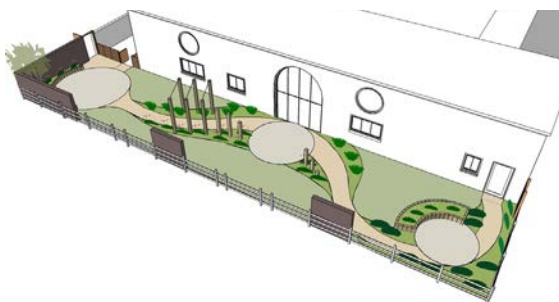

Design Process

Dave Green Gardens follows a rigorous design process to create a garden space that not only fulfils your needs but one that you will be proud of. The steps involved in the process are outlined below and Dave will talk you through these steps during in an initial visit to see your garden.

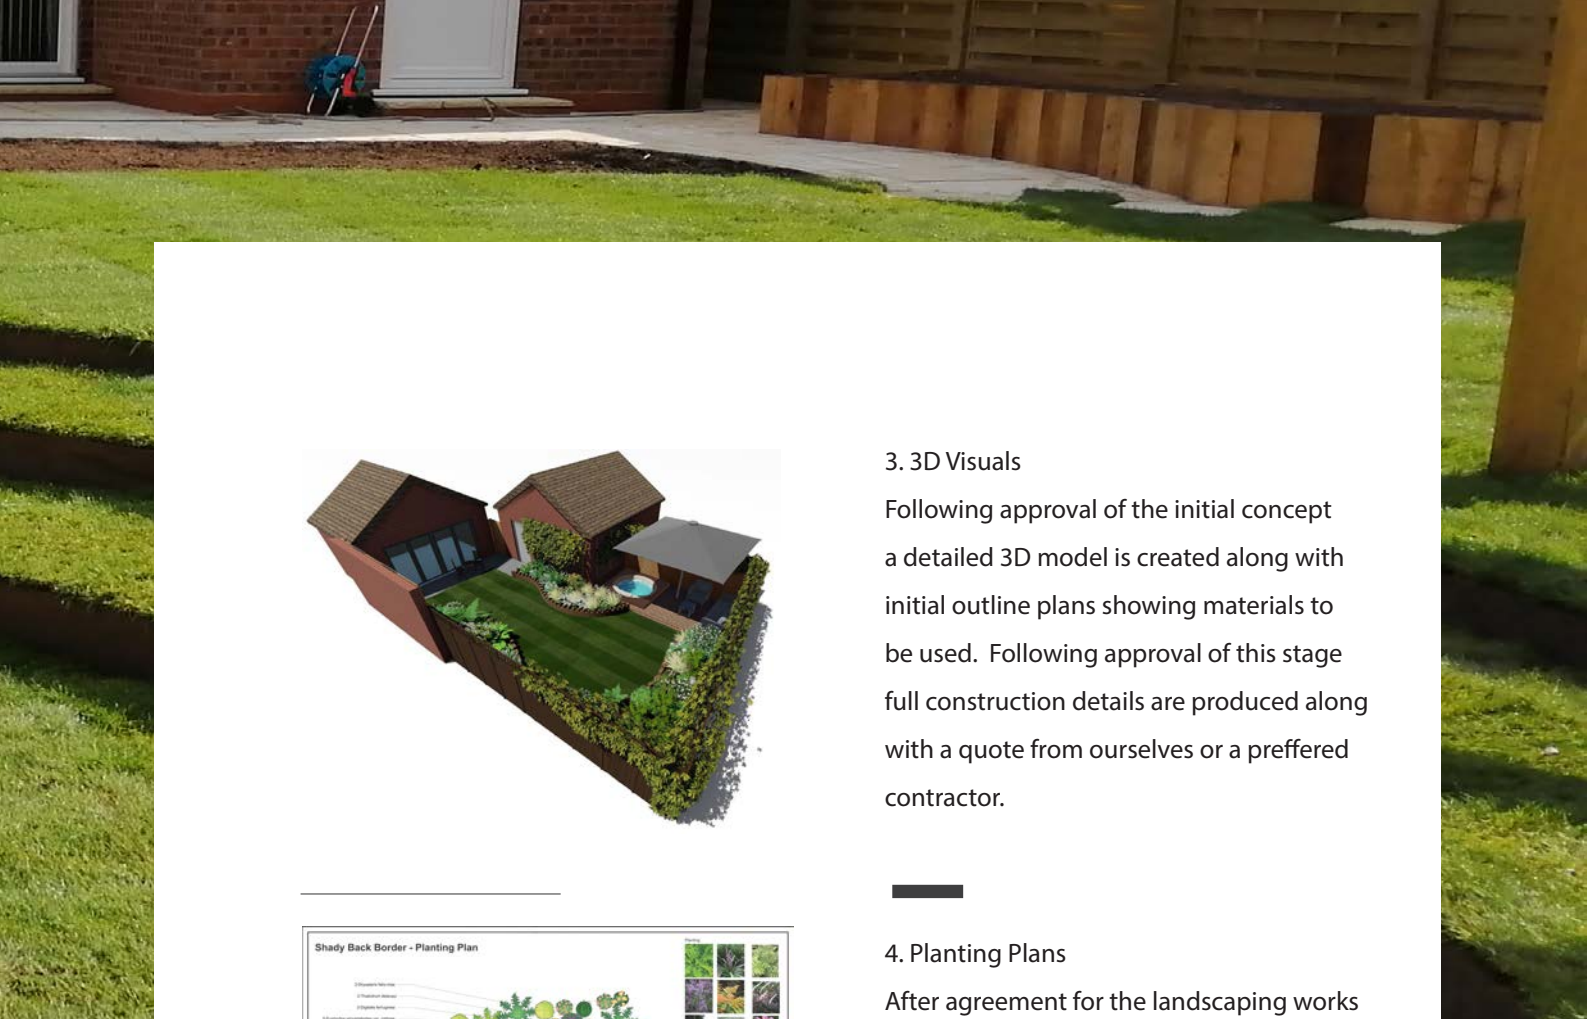

1. Site Survey

A survey of the site is carried out by a professional land surveyor. A simplified version of the survey is created by us along with a Site Analysis highlighting specific features of the site.

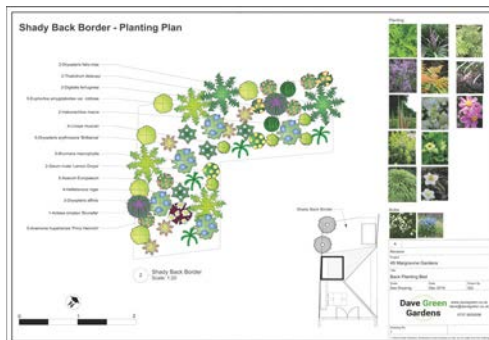

2. Outline Plan

Using a brief and the survey a new initial layout and concept for the garden space including a basic 3D model will be developed. Image boards for materials and planting are also created.

3. 3D Visuals

Following approval of the initial concept a detailed 3D model is created along with initial outline plans showing materials to be used. Following approval of this stage full construction details are produced along with a quote from ourselves or a preferred contractor.

4. Planting Plans

After agreement for the landscaping works planting plans can be produced to specifically detail the plant numbers and species to be used in the garden.
